CAREER OBJECTIVE

Curious, driven, and passionate about technology, I am a second-year B.Tech student in Artificial Intelligence and Data Science seeking an internship opportunity where I can translate classroom knowledge into real-world applications, contribute to innovation, and grow as a data-driven problem solver.

PROJECTS

- **AI-Based Image Super-Resolution Using Deep Learning**
Developed and deployed an ESRGAN model using Flask to enhance low-resolution images with AI-powered upscaling.

- **Diabetes Prediction using Machine Learning**
Utilized Python and ML classifiers on the Pima Indian dataset, focusing on prediction accuracy and model evaluation.

- **Comparative Study of Decision Tree Algorithms**
Analyzed ID3, CART, and Random Forest using Python visualizations, showcasing performance and real-world use cases.

- **Web-Based AI Image Enhancer**
Built an end-to-end Streamlit application for image restoration using deep learning, providing an intuitive web interface.
